

Did you know MIDWEST Electrical Testing offers an ON-LINE MAINTENANCE PROGRAM?

MIDWEST would provide your company with private access to our "Web Server" such that you would have immediate and constant access to your Electrical Maintenance Program and the history of your electrical transformers, circuit breakers, switchgear, etc. You would have a "User Name" and "Password" that would give you private internet access to your Switchgear Maintenance History on our Web Server. Our server is on-line 24 hours a day, seven days a week at www.swgr.com.
