For Technical Specifications and Accessories, see Square D Product Catalog.

Reconditioned Bus Plugs - The Bus Plug has been reconditioned per MIDWEST's rigorous service procedures based on 30 years experience. The Bus Plug has been maintained and refurbished per industry standards and per MIDWEST's Quality Control Program (QCP). The services include applicable internal and external procedures, repairs, and replacement of deficient components. In addition to standard electrical tests, MIDWEST also performs live function tests on the Bus Plug. These services far exceed the routine reconditioning of the Bus Plug performed by many bus plug vendors and resellers. MIDWEST certifies the Bus Plug has passed our QCP before shipping.

New Surplus Bus Plugs - A "New Surplus" Bus Plug is a bus plug that has never been installed, but is not "New from the Factory" or "New from the Manufacturer or Distributor" of the Bus Plug. It may be referred to as New in the Box, New Surplus, Never Installed, Never Energized, or other such terms that avoids the label "New from the Manufacturer." A New Surplus Bus Plug should not be considered new from the manufacturer or manufacturer's Distributor. Surplus and New Surplus Bus Plugs must pass MIDWEST's (QCP) Quality Control Program.

* MIDWEST is not a Square D or Schneider Electric authorized distributor. MIDWEST specializes in New Surplus and Reconditioned equipment.
